

One of the most memorable and significant projects I worked on was for the popular television show Cooku with Comali Season 6, where I created everything within a very short period of just 12 hours. It was truly an honour to be a part of such a renowned production, especially contributing to the very first episode. For this project, I designed 10 unique visuals, each one thoughtfully crafted to represent a specific character on the show. Seeing my work showcased on-screen was incredibly rewarding. Despite the tight deadline, the experience taught me the importance of working under pressure while maintaining attention to detail. This project not only enhanced my creative skills but also broadened my knowledge of working within the fast-paced world of television production.
